Tibbitts and Katherine of Richfield and Mr. and Mrs. Clark Tibbitts were Sunday guests at the home of Mr. and Mrs. E. E. Henry and Mrs. Mary Henry.

Cows Produce Highest Average In History.

Chris Dueholm who has managed the Fayette county Cow Testing association No. 3 for nearly five years, has recently turned the association over to Ralph E. Baker of Spencer, Iowa, for the summer and will leave soon for Denmark where he will spend his vacation. He has just completed a month in which the association produced the highest average in its history from the 25 cows of which number 11 were dry. The high average was made possible through careful culling and proper feeding, as 21 of the 26 herds received concentrates with the pasture during the month. Eight of the cows produced over 60 lbs. of fat, 17 over 50 lbs. and 82 over 40 lbs. The average production per cow was 869 lbs. of milk and 22.3 lbs. of fat. There were five cows which produced an average of over two pounds of fat daily for the month and four of these were fed concentrates as a supplement to pasture. They are as follows:

L. C. Johnston, Grade Holstein, fresh April 18, 1875 lbs. of milk, 75.9 lbs. of fat. W. H. Turner, pure bred Holstein, fresh Jan. 16, 1760 lbs. of milk, 66.7 lbs. of fat. 65.8 lbs. of fat; Fred Engles, grade Holstein fresh Feb. 14, 1559 lbs. of milk and 65.5 lbs. of fat.

Among the ten high herds, 7 received a strictly balanced ration, one was fed soy beans, and only one received no concentrates with the pasture. This one was fed a silage supplement. Results follow:

W. E. Kitch, 9 pure bred Holsteins, averaging 1283 pounds of milk and 44.2 pounds of fat. A. J. Meyer, 12 pure bred Holsteins, averaging 1043 pounds of milk and 42.6 pounds of fat. L. C. Johnston, 10 mixed grades, averaging 1027 pounds of milk and 41.6 pounds of fat. Fred Engles, 15 grade Holsteins, averaging 987 lbs. of milk and 41.5 pounds of fat. M. E. Talcott, 13 pure bred Holsteins, averaging 1066 pounds of milk and 39.8 pounds of fat. Simon Harrison, 8 pure bred Holsteins, averaging 894 pounds of milk and 39.6 pounds of fat. W. H. Turner, 8 pure bred Holsteins, averaging 1111 pounds of milk and 39.4 pounds of fat. Carl Meihe, 10 pure bred Holsteins averaging 1104 pounds of milk and 39.4 pounds of fat. Emil Steege, 9 pure bred Holsteins, averaging 996 pounds of milk and 39.2 pounds of fat. Donn Talcott, 6 pure bred Holstein, averaging 1189 pounds of milk and 37.3 pounds of fat.

Miller Implement Company—McCormick-Deering Headquarters

WISDOM AND WIT

Published each week in the interests of Profitable, Progressive Farming and a Happy, Prosperous Community. Suggestions Invited.

Vol. 1. Thursday, June 12, 1930. No. 8.

WHEN YOU WANT IT—
We talk a lot about McCormick-Deering Big Ball twine. But we have a lot to sell which should justify lots of talk. Honestly, though, we believe you get more for your money from this twine than you do from any other that you can buy, and you have the satisfaction of knowing that in a business such as we are trying to run, it is necessary that we take care of our customers until the last bundle is tied. This is a service that all dealers are not in a position to give.

We wonder what kind of pessimism it was which prompted those highway commission men last week to put up those beautiful railroad warning signs on the "Dinky" crossing while they were marking the rest of '93'?

WHAT A RAIN—
Wasn't that a beautiful rain, coming as it did just about nine minutes, more or less, before it was needed? And did you take advantage of the chance it gave you to check up on needed repairs for harvest machinery and to figure out how much binding twine you will need? We know a lot of

farmers who make their rainy days as profitable as any other just by doing these little things that will save them time and money later.

Before this ad is finished there will be no doubt in the minds of our readers about what we did on this rainy day.

NO FLIES ON THE FARMALL—
While we are on the subject of rain. Many people think the implement dealers are trying to eliminate horses from the farm, which is far from being true. Without horses, think of how many more flies we would have at our backdoor on one of those rainy days! In attempting to sell Farmall Tractors we do not expect them to replace all of the horses. But we do expect them to relieve the farmer of some of this burden. The Farmall is the most practical equipment ever designed for general use, and can be kept in service from the beginning of the year to the end.

"Hee Haw News" may remark that we wouldn't have to worry about flies at the

backdoor on a rainy day or any other day if we were properly fitted with "Screens of Quality."

Even at that, a danger signal at any railroad crossing may be a wise precaution, even though trains don't run oftener than once a week.

LEST YOU FORGET—
This week's best buys in used machines are:—
1—15-30 McCormick - Deering Tractor.
1—Hay Ruck.
1—Tower Surface Cultivator.

Three or four machines were going to spread lime and three or four speakers were going to spread "bull" out at Hiram Leaso's last Friday in a lime and legume demonstration. But he promised "knock-out" because a "wash-out" after the rain, and was postponed for a couple of weeks. We had some surprises for you—but they'll keep.

And speaking of danger signals, the wise farmer is the one who listens to the warning of a threatened break-down in a piece of farm equipment and prepares for the emergency before a lay-up will be costly.
