FLUSH OUT 15 MILES OF KIDNEY TUBES

Medical authorities agree that your kidneys contain 15 MILES of tiny tubes or filters which help to purify the blood and keep you healthy. If you have trouble with too frequent urination, passages with scant amount causing burning and discomfort, the 15 MILES of kidney tubes may need flushing out. This danger signal may be the beginning of nagging backache, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes and dizziness.

If kidneys don't empty 3 pints a day and so get rid of more than 2 pounds of waste, poisonous matter may develop, causing serious trouble. Don't wait. Ask your druggist for DOAN'S PILLS, which have been used successfully by millions of people for over 40 years. They give happy relief and will help to flush out the 15 MILES of kidney tubes. AMERICA LEADS THE WORLD

With only six per cent of the world's population, the United States has half the world's telephones and makes three-fifths of the world's telephone calls.

For more than 50 years, the Bell System, organized substantially as it is today, has worked constantly to improve and extend service and keep down its cost to telephone users. Today American telephone service is the standard for the world.
