Maurice Rommel and daughter Betty visited in the Fred Homing home Sunday.

2 TIRES FOR THE PRICE OF 1

For the Standard List Price of one first line, 6 ply tire (used by most of the large rubber companies), we will give you two, first line, 6 ply Pharis Tires.

However, we do not mean that we will give two, first line, 6 ply tires for the Pharis list price of one, nor for our own list price of one. We are merely using this illustration as a guide to show what you actually pay for these tires.

The Pharis factory places a seal on every first line Pharis tire, certifying that it is their first line tire.

HERE'S WHERE THE DIFFERENCE IN TIRE COSTS COMES IN:

First: In the Pharis Line, you do not pay for national magazine advertising, as Gamble's know of no advertising planned for 1934, except in trade magazines to dealers.

Second: Sometimes the only selling expense of 50,000 tires is a letter or a telephone call to the factory.

Third: The tires go mostly to the territory where they are needed, without going to jobbing centers and then being re-distributed. Thus, savings on transportation are made.

Fourth: Gamble's sell for cash, so you do not help pay for tires others cannot pay for. Fifth: Gamble's do not have elaborate service stations.

Isn't it easy to see, with all these savings, that Gamble's can sell first line tires at a big saving, without taking it out of the quality? Gamble's honestly believe that they are giving you more mileage per dollar in this first line tire, than any other rubber company gives in theirs.

STANCO TIRE

A sturdy, well-built tire that will give miles of wear - much more than you'd expect at this low price.

30x3 1/2 Only - Each \$2.69

Table with 3 columns: Standard List Price, Our Price, Our Price. Lists prices for various tire sizes like 4.40/21, 4.50/21, etc.
