#### Butterick Patterns

LITERALLY hundreds of millions of Butterick patterns have been used all over the world. They have been a boon to hundreds of thousands of mothers in making clothes at home for their families. Now whom do they have to thank—Miss Butterick? Mrs. Butterick? No, neither. The inventor of this home dressmaking aid was a man, Ebenezer Butterick.

After some experiments he cut his first salable patterns June 16, 1863. The first patterns were folded by members of his family. In September he had to take extra rooms in a building nearby and five girls were hired to do the folding—but Ebenezer still managed to keep his beard out of the way and kept on with the cutting.

The business moved to New York and continued to grow to the point where single cutting machines cut out thousands of patterns of each size at a single stroke. The word "Butterick" in electric lights on the top of the 15-story Butterick building, completed in 1904, was then the largest electric sign in the world. (Released by Western Newspaper Union.)

E. Butterick
